DIV OF OIL GAS & MINING

Inspection Report

S/019/053

Case File: UTU-78691/Travertine
Inspectors: Denice Swanke
Date of Inspection: 11 February 2003
Date of Report: 09 September 2003

I had an appointment to meet Deloy Shumway at the site at 0900. I arrived at 0930 and completed an inspection of the site, although Deloy was not present. As I was leaving the site at approximately 10:15, I passed Deloy on the access road and we talked briefly about the need for bonding and that I would be sending him a letter recommending a bond amount. He stated that Earl had been hospitalized and was going to be recovering in Colorado for several months and that the operation would be idle unless he could locate an operator. He is still attempting to market the material.

The trailer house and all equipment which was at the site during the last inspection appear to be in the same condition. There was a blue and white Dodge Ram Charger at the site with a flat front tire on the drivers side and with expired plates (November 2002).

A gate has not yet been constructed as authorized, and the authorized fencing is still only 50% completed. Additional no trespassing signs have been placed on the access road (see photos) and there was a trailer blocking the road up the hill. This trailer was not present at the site previously and has not been authorized.

Hi Paul -

Sorry for not getting this out sooner. I am planning to get out to the site sometime this month and will update you then.

My tentative bond amount was \$15,000.

I will review that soon then send Deloy a letter.

Denice
